

NVDA: Leitor de Tela Livre para Windows.

NonVisual Desktop Access (NVDA) é um *software* que tem o objetivo de auxiliar pessoas com deficiências visuais, realizando leitura de tela, isto é, descreve, por meio da audiodescrição, itens existentes na tela do computador.

Para a sua instalação, você terá que seguir as etapas abaixo:

Como instalar NVDA – Leitor de tela

1. No navegador, digite o endereço www.nvda-project.org/snapshots.
- 1.1. Você irá visualizar a página **NVDA Development Snapshots**. Nesta página, posicione o ponteiro do mouse no primeiro link, em **Download**, e clicar.

NVDA Development Snapshots

Included here are automatically generated snapshots of the project in its current state of development. This allows for testing of new features, but it is possible that there may be possibly be nasty bugs and broken code, and we will not provide any support for these snapshots. Constructive feedback is appreciated.

All dates and times are in UTC.

alpha

Alpha snapshots contain bleeding-edge code. These snapshots are generated straight from NVDA's mainline (master) branch. Although there are some automated tests, code in this branch may have not been tested at all by users. This should never be used in production.

nvidia_snapshot_alp...exe

1.3. Será visualizada a janela **Abrir Arquivo – Aviso de segurança**. Clique no botão **Executar**.

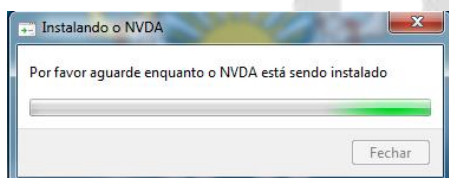

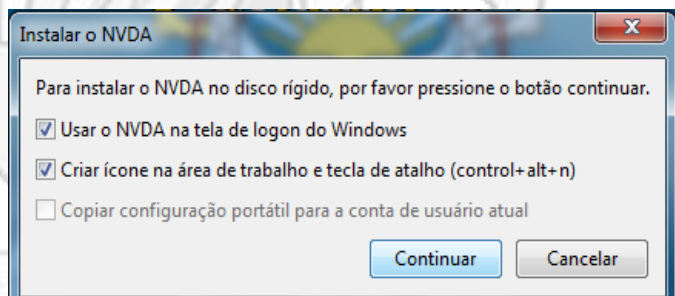

1.4. Quando for iniciada a instalação, o **NVDA** já irá funcionar parcialmente, fazendo a leitura da tela de cada palavra em que o cursor do mouse estiver posicionado. Aguardar a visualização da janela (demora um pouco).

1.5. Em aceite de licença, marque o item **Concordo** e, em seguida selecionar a opção **“Instalar o NVDA neste computador”**.

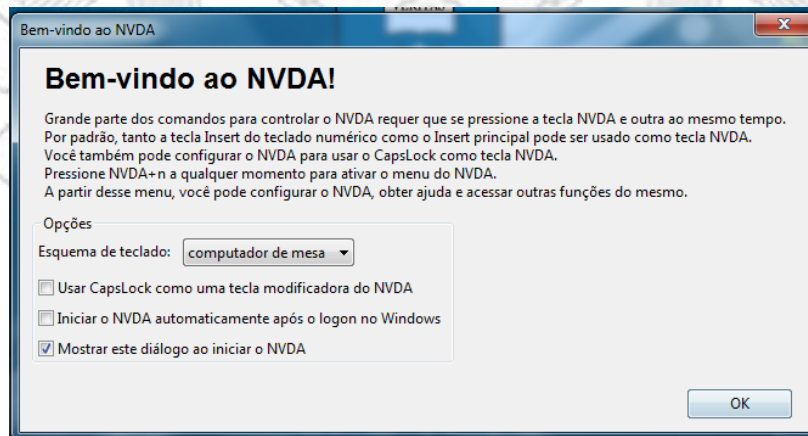

1.6. Para prosseguir com a instalação basta clicar no botão **Continuar**.

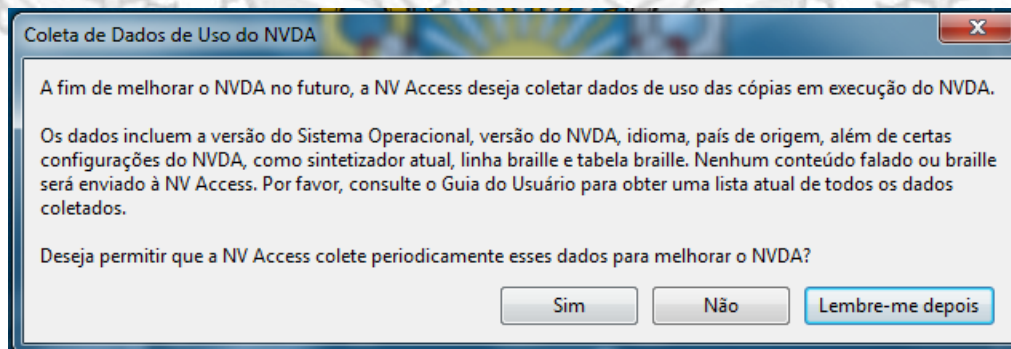

1.7. Aguarde a instalação ser concluída.

Após finalizar a instalação

2. Leia as opções de configuração, selecione as de sua preferência e clique no botão “OK”.

- 2.1. Caso queira que o **NVDA** armazene os dados de uso, registrando seu histórico, clique em “SIM”, caso contrário em “Não”.

Pronto! O NVDA foi instalado.

O ícone será visualizado na área de trabalho.
